FAVICON MARK

Gold square #B8960C

Black 'B'

Sizes: 32 / 256 px

files: favicon-gold-B.png

TYPOGRAPHY

Fraunces (heading)

Georgia / Georgia Bold

Operator-led conviction.

Inter (body)

Segoe UI / Segoe UI Bold

Clear, neutral, modern.

JetBrains Mono (meta)

Consolas / Consolas Bold

Labels, codes, specs.

Tokens centralized; gold locked to #B8960C per A1 live-source verification.
Live site was unreachable from build sandbox - gold not independently re-fetched.

PROVENANCE & TOKEN LOG

what changed, why, and what to confirm next

SOURCE

Live site verified as A1 authentic source. On-disk 'logo' PNGs belonged to other companies and were discarded - good we checked.

GOLD

Updated #EEC050 (on-disk build snapshot) -> #B8960C (A1 live favicon/CSS). User-verified. If wrong, single-line swap in build_assets.py.

MARK

Gold square #B8960C + black 'B'. Rendered at 32 & 256 px (favicon set). On-disk mark assets were other companies' logos - not used.

FONT

Offline substitutes: Fraunces->Georgia, Inter->Segoe UI, JetBrains Mono->Consolas. Swap to live webfonts at deploy for final fidelity.

VERIFY

Live site (blackgoldequitypartners.com) unreachable from build sandbox at gen time. Re-fetch CSS :root on a networked box to confirm gold + all tokens.

TOOLING

No HTML->PDF engine (wkhtmltopdf/weasyprint/chromium) and no pip network. Fallback: PIL raster -> PDF. Re-render with real engine when available.

Next: confirm gold on networked box; produce HTML->PDF with real engine; wire favicon into blackgold-equity-partners build before Vercel push.
